PREMIUM CALCULATION WORKSHEET

For Conversion from Group Life to Individual Whole Life Policy

Premiums are payable to age 120 or death, whichever occurs first. To calculate your premium, find your present age and the corresponding **table rate per $1,000** from the columns below. Multiply this premium by the number of thousands of dollars of insurance you plan to convert. Then add a $90.00 policy fee. Then multipy the sum of the premium and the policy fee by the premium factor to find your modal premium.
